This book stresses the importance of aligning developing countries' economic activities towards sustainable development purposes. A revamp of the financial systems of emerging economies is necessary to allow the financial resources needed for investment purposes to become readily available on these markets. The failure of most countries to grow and develop is often caused by the inability of potential investors to access capital for investment purposes. By modernizing the financial sectors of developing nations, this book argues, it is possible to industrialize their approaches to growth and development.

From small law offices to federal agencies, all entities within the justice system are governed by complicated economic factors and face daily financial decision-making. A complement to Strategic Finance for Criminal Justice Organizations, this volume considers the justice system from a variety of economic and financial perspectives and introduces quantitative methods designed to improve the efficiency and effectiveness of organizations in both the non-profit and for-profit sectors. Using only a minimum of theory, Economic and Financial Analysis for Criminal Justice Organizations demonstrates how to make decisions in the justice system using multiple financial and economic models. Designed for readers with little knowledge of advanced mathematics, quantitative analysis, or spreadsheets, the book presents examples using straightforward, step-by-step processes with Excel and Linux Calc spreadsheet software. A variety of different types of decisions are considered, ranging from municipal bond issuance and valuation necessary for public revenues, pension planning, capital investment, determining the best use of monies toward construction projects, and other resource planning, allocation, and forecasting issues. From municipalities and police departments to for-profit prisons and security firms, the quantitative methods presented are designed to improve the efficiency and effectiveness of all organizations in the justice domain.

A Textbook of Cost and Management Accounting provides the students with thorough grounding in cost concepts, cost behaviour and methods, and techniques of cost and management accounting with an understanding of the uses and limitations of cost and financial data for managerial operations. Corporate Finance, by Ross, Westerfield, Jaffe, and Jordan emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The Eleventh Edition includes many exciting new research findings as well as an enhanced Connect Finance, now with even more student learning resources. Connect is proven to deliver better results for students and instructors. Proven content integrates seamlessly with enhanced digital tools to create a personalized learning experience that provides students with precisely what they need, when they need it. With Connect, the educational possibilities are limitless.

Financial Management in the Sport Industry provides readers with an understanding of sport finance and the importance of sound financial management in the sport industry. It begins by covering finance basics and the tools and techniques of financial quantification, using current industry examples to apply the principles of financial management to sport. It then goes beyond the basics to show how financial management works specifically in sport - how decisions are made to ensure wealth maximization. Discussions include debt and equity financing, capital budgeting, facility financing, economic impact, risk and return, time value of money, and more. The final section focuses on sport finance in three sectors of the

industry - public sector sports, collegiate athletics, and professional sport-providing in-depth analysis of financial management in each sector. Sidebars, case studies, concept checks, and practice problems throughout provide practical applications of the material and enable thorough study and practice. The business of sport has changed dynamically since the publication of the first edition, and this second edition reflects the impact of these changes on financial management in the sport industry. New to this edition are changes to reflect the global nature of sport (with, for example, discussions of income tax rates in the Premiere League), expanded material on the use of spreadsheets for financial calculations, a primer on accounting principles to help students interpret financial statements, a valuation case study assignment that takes students step by step through a valuation, a new stadium feasibility analysis using the efforts of the Oakland Raiders to obtain a new stadium, a new economic impact example focusing on the NBA All Star game, and much more.
