

Mastering Modern World History 4th Ed Norman Lowe

A new edition of the bestselling classic – published with a special introduction to mark its 10th anniversary This pioneering account sets out to understand the structure of the human brain – the place where mind meets matter. Until recently, the left hemisphere of our brain has been seen as the ‘rational’ side, the superior partner to the right. But is this distinction true? Drawing on a vast body of experimental research, Iain McGilchrist argues while our left brain makes for a wonderful servant, it is a very poor master. As he shows, it is the right side which is the more reliable and insightful. Without it, our world would be mechanistic – stripped of depth, colour and value.

This edition provides in-dept analysis of British history from 1815 to present (2015).

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future--one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

The perfect companion for pointed pen and digital calligraphers alike, with more than 2,700 letterforms and ligatures, stroke drills, warm-up exercises, flourishes, and simple words and phrases. This beautiful, in-depth guide to modern calligraphy emphasizes experimentation and fun, rather than rigid uniformity. With targeted exercises and lessons aimed at pushing you out of your calligraphy comfort zone, Mastering Modern Calligraphy will not only help you master tricks of the trade, but develop your very own modern calligraphy style, too.

This book is a guide to the TypeScript language, from basic concepts to advanced features, and will get you up and running quickly. You'll learn TypeScript programming in depth as you use popular application frameworks and utilize modern design patterns and architectural patterns to build modular, testable and enterprise-ready applications.

Mastering Modern European History traces the development of Europe from the French Revolution to the present day. Political, diplomatic and socio-economic strands are woven together and supported by a wide range of pictures, maps, graphs and questions. Documentary extracts are included throughout to encourage the reader to question the nature and value of various types of historical evidence. The second edition brings us fully up to the present day. Chapters on European Decolonisation, Communist Europe 1985-9, and European Unity and Discord have been added, and others have been substantially rewritten. An even wider range of illustrations and documentary source questions are included. The book is presented in a readable and well ordered format and is an ideal reference text for students.

A “must-read” (The Washington Post) funny and practical guide to help you find, build, and keep the relationship of your dreams. Have you ever looked around and wondered, “Why has everyone found love except me?” You’re not the only one. Great relationships don’t just appear in our lives—they’re the culmination of a series of decisions, including whom to date, how to end it with the wrong person, and when to commit to the right one. But our brains often get in the way. We make poor decisions, which thwart us on our quest to find lasting love. Drawing from years of research, behavioral scientist turned dating coach Logan Ury reveals the hidden forces that cause those mistakes. But awareness on its own doesn’t lead to results. You have to actually change your behavior. Ury shows you how. This “simple-to-use guide” (Lori Gottlieb, New York Times bestselling author of Maybe You Should Talk to Someone) focuses on a different decision in each chapter, incorporating insights from behavioral science, original research, and real-life stories. You’ll learn: -What’s holding you back in dating (and how to break the pattern) -What really matters in a long-term partner (and what really doesn’t) -How to overcome the perils of online dating (and make the apps work for you) -How to meet more people in real life (while doing activities you love) -How to make dates fun again (so they stop feeling like job interviews) -Why “the spark” is a myth (but you’ll find love anyway) This “data-driven” (Time), step-by-step guide to relationships, complete with hands-on exercises, is designed to transform your life. How to Not Die Alone will help you find, build, and keep the relationship of your dreams.

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, Guns, Germs, and Steel chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

NATIONAL BESTSELLER • “A startling vision of what the cycles of history predict for the future.”—USA Weekend William Strauss and Neil Howe will change the way you see the world—and your place in it.

With blazing originality, *The Fourth Turning* illuminates the past, explains the present, and reimagines the future. Most remarkably, it offers an utterly persuasive prophecy about how America's past will predict its future. Strauss and Howe base this vision on a provocative theory of American history. The authors look back five hundred years and uncover a distinct pattern: Modern history moves in cycles, each one lasting about the length of a long human life, each composed of four eras—or "turnings"—that last about twenty years and that always arrive in the same order. In *The Fourth Turning*, the authors illustrate these cycles using a brilliant analysis of the post-World War II period. First comes a High, a period of confident expansion as a new order takes root after the old has been swept away. Next comes an Awakening, a time of spiritual exploration and rebellion against the now-established order. Then comes an Unraveling, an increasingly troubled era in which individualism triumphs over crumbling institutions. Last comes a Crisis—the Fourth Turning—when society passes through a great and perilous gate in history. Together, the four turnings comprise history's seasonal rhythm of growth, maturation, entropy, and rebirth. *The Fourth Turning* offers bold predictions about how all of us can prepare, individually and collectively, for America's next rendezvous with destiny.

This business classic features straight-talking advice you'll never hear in school. Featuring a new foreword by Ariel Emanuel and Patrick Whitesell Mark H. McCormack, one of the most successful entrepreneurs in American business, is widely credited as the founder of the modern-day sports marketing industry. On a handshake with Arnold Palmer and less than a thousand dollars, he started International Management Group and, over a four-decade period, built the company into a multimillion-dollar enterprise with offices in more than forty countries. To this day, McCormack's business classic remains a must-read for executives and managers at every level. Relating his proven method of "applied people sense" in key chapters on sales, negotiation, reading others and yourself, and executive time management, McCormack presents powerful real-world guidance on • the secret life of a deal • management philosophies that don't work (and one that does) • the key to running a meeting—and how to attend one • the positive use of negative reinforcement • proven ways to observe aggressively and take the edge • and much more Praise for *What They Don't Teach You at Harvard Business School* "Incisive, intelligent, and witty, *What They Don't Teach You at Harvard Business School* is a sure winner—like the author himself. Reading it has taught me a lot."—Rupert Murdoch, executive chairman, News Corp, chairman and CEO, 21st Century Fox "Clear, concise, and informative . . . Like a good mentor, this book will be a valuable aid throughout your business career."—Herbert J. Siegel, chairman, Chris-Craft Industries, Inc. "Mark McCormack describes the approach I have personally seen him adopt, which has not only contributed to the growth of his business, but mine as well."—Arnold Palmer "There have been what we love to call dynasties in every sport. IMG has been different. What this one brilliant man, Mark McCormack, created is the only dynasty ever over all sport."—Frank Deford, senior contributing writer, *Sports Illustrated*

Praise for the First Edition: "This outstanding book ... gives the reader robust concepts and implementable knowledge of this environment. Graphical user interface (GUI)-based users and developers do not get short shrift, despite the command-line interface's (CLI) full-power treatment. ... Every programmer should read the introduction's Unix/Linux philosophy section. ... This authoritative and exceptionally well-constructed book has my highest recommendation. It will repay careful and recursive study." --Computing Reviews, August 2011 *Mastering Modern Linux*, Second Edition retains much of the good material from the previous edition, with extensive updates and new topics added. The book provides a comprehensive and up-to-date guide to Linux concepts, usage, and programming. The text helps the reader master Linux with a well-selected set of topics, and encourages hands-on practice. The first part of the textbook covers interactive use of Linux via the Graphical User Interface (GUI) and the Command-Line Interface (CLI), including comprehensive treatment of the Gnome desktop and the Bash Shell. Using different apps, commands and filters, building pipelines, and matching patterns with regular expressions are major focuses. Next comes Bash scripting, file system structure, organization, and usage. The following chapters present networking, the Internet and the Web, data encryption, basic system admin, as well as Web hosting. The Linux Apache MySQL/MariaDB PHP (LAMP) Web hosting combination is also presented in depth. In the last part of the book, attention is turned to C-level programming. Topics covered include the C compiler, preprocessor, debugger, I/O, file manipulation, process control, inter-process communication, and networking. The book includes many examples and complete programs ready to download and run. A summary and exercises of varying degrees of difficulty can be found at the end of each chapter. A companion website (<http://mml.sofpower.com>) provides appendices, information updates, an example code package, and other resources for instructors, as well as students.

How to strive for peace in mind, body, and spirit by incorporating the Greek philosophy of stoicism, even if you feel like your life is out of control. Our modern world is fast-paced, chaotic, and it often sends us on an emotional rollercoaster ride. We struggle to stay afloat as we're caught in the tide of social media, constant comparison, the need for success, and a lack of moderation. If you're ready for the madness to end, you're not alone. In fact, even the ancient Greeks sought a way to bring simplicity back to their lives. If you're tired of fighting against the world and are ready to embrace the benefits of stoicism, you've found the right book. *Stoicism in Modern Life - Mastering the Stoic Way of Life: Improve Your Mental Toughness, Self-Discipline, and Productivity With Ancient Stoic Wisdom* will quickly become your go-to guide on your journey to a stoic life. Not only will you learn the fascinating history of stoicism and its greatest teachers. You will also encounter practical examples and real-world situations that will allow you to apply the ideals of stoicism even in today's society. In this book, you'll learn about: ?How stoicism applies to modern life ?The philosophy of stoicism ?Marcus Aurelius, Seneca, and Epictetus, stoicism's most influential thinkers ?Where to apply stoicism in your day to day life ?What stoicism does to the mind ?What stoicism looks like in action in today's world ?And much more! When life hands you chaos, transform it into peace with the help of stoicism. You can't rely on things getting easier, but you can rely on the teachings of stoicism to help you master your emotions, reign in your fear, and face reality with a smile rather than a frown. An emotionally satisfying life is within reach. Click "add to cart" to take action today and learn how the secrets of stoicism can lead you to a better tomorrow.

A riveting, comprehensive history of the Arab peoples and tribes that explores the role of language as a cultural touchstone This kaleidoscopic book covers almost 3,000 years of Arab history and shines a light on the footloose Arab peoples and tribes who conquered lands and disseminated their language and culture over vast distances. Tracing this process to the origins of the Arabic language, rather than the advent of Islam, Tim Mackintosh-Smith begins his narrative more than a thousand years before Muhammad and focuses on how Arabic, both spoken and written, has functioned as a vital source of shared cultural identity over the millennia. Mackintosh-Smith reveals how linguistic developments--from pre-Islamic poetry to the growth of script, Muhammad's use of writing, and the later problems of printing Arabic--have helped and hindered the progress of Arab history, and investigates how, even in today's politically fractured post-Arab Spring environment, Arabic itself is still a source of unity and disunity.

This book is a complete, readable, condensed course for individual study or classroom use.

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of

what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Mastering Twentieth Century Russian History presents a vivid and informative account of the events which befell the Russian people during the course of the twentieth century. - Explores the major developments of the last century, from the revolution of 1905, to the First and Second World Wars, to the Cold War and the rise and fall of the USSR - Examines key figures and their actions - from Nicholas II, Lenin, Trotsky, Stalin, Khrushchev, Brezhnev, Gorbachev and Yeltsin to Putin - Deals with events right up to 2000, enabling the Soviet experiment to be placed in context a decade after its collapse - Incorporates the latest research from British, American and Russian historians, examining key controversies and debates - Includes primary source material, maps, photographs, posters and a full chronology of events This text is the ideal companion for anyone seeking a clear yet detailed introduction to the fascinating events of twentieth century Russian history.

A concise survey of the culture and civilization of mankind, The Lessons of History is the result of a lifetime of research from Pulitzer Prize-winning historians Will and Ariel Durant. With their accessible compendium of philosophy and social progress, the Durants take us on a journey through history, exploring the possibilities and limitations of humanity over time. Juxtaposing the great lives, ideas, and accomplishments with cycles of war and conquest, the Durants reveal the towering themes of history and give meaning to our own.

Mastering Modern World History Red Globe Press

The fifth edition of this bestselling book is for school and college students taking courses in Modern World History and for undergraduates in History and International Relations. It is a complete, self-contained, lively and highly readable course, suitable for individual study or classroom use. The general reader who wishes to find out how the world got into its present state will also find the book useful. Key features of the fifth edition: • A new chapter on Latin America and its changing relationship with the USA • New sections on the Arab Spring, the 2008 financial crash and its aftermath, and the European Union in crisis • New material on the changing face of communism in China; USA: Bush to Obama; Russia under Putin and Medvedev; the continuing conflict between Palestinians and Israelis and the 'war against terrorism' Content includes: • A survey of international relations and war from 1900 to 2012 • Europe and its history - the rise and fall of fascism and communism • International affairs of the major superpowers - USA, Russia/USSR and China • International conflict - The Holocaust, 9/11 and the fall of Saddam Hussein • Decolonization and subsequent events in Africa, and the rise of political Islam • Global problems - climate change, economic crises, the population 'explosion' • Mention of disagreements and controversies among historians, as well as new interpretations and discoveries Norman Lowe has had many years' experience of teaching History at all levels, and for 25 years was Head of History at Nelson and Colne College in Lancashire. He is the author of Mastering Modern British History and Mastering Twentieth Century Russian History. Fully updated companion website with examples of document questions for each chapter www.palgrave.com/masterseries/Lowe

This book covers the major topics of modern world history in a clear and concise style. After a general introduction, themes are developed in more detail, with headings, key words, and phrases underlined. With its easy to follow cross-referencing and helpful problem-solving approach, this text is the ideal introduction to higher level study of modern world history.

Mastering Advanced Modern Chinese through the Classics is a textbook to teach those who wish to achieve an advanced or native proficiency and cultural competence in modern Chinese, as well as to experience the beauty of Classical Chinese literature. Collecting representative works containing vibrant views of Chinese culture from different dynasties, this book is focused on how the grammatical patterns, vocabulary, and idioms that are found in Classical Chinese are relevant in the modern adaptation of the language, and how the accumulated traditional values and beliefs found there still shape the thinking and lifestyle of modern society. Online resources including audio, answer keys, and instructor aids will be part of the teaching package.

Written by teachers, for teachers, this guide offers instructional resources for all the AP World History exam components, including: stimulus-based multiple-choice questions, short-answer questions, document analysis, document-based essay questions, and long essay questions. Teacher introductions to each section include pacing suggestions, and tried and true teaching tips. Student learning guides introduce the skill to the student step-by-step, providing ample opportunity for guided practice. Additional assessments are also included to allow for further practice and mastery. Building off the success of the first edition, this second edition is updated to reflect the latest changes to the exam, specifically the more open-ended essay prompts and the "complexity" component. This guide is an invaluable resource for experienced and new teachers alike.

AP Biology Premium Prep, 2021, previously titled Cracking the AP Biology Exam, Premium Edition, will now include a total of 6 full-length practice tests. The Premium edition continues to provide students with comprehensive topic reviews of all AP Biology subjects, from photosynthesis to genetics to evolution. It also includes strategies for all AP Biology question types, including grid-in and short free-response questions, and contains detailed guidance on how to write a topical, cohesive, point-winning essay. This Premium edition now includes 6 full-length practice tests (4 in the book and 2 online) for the most practice possible.

Master the art of conducting modern pen testing attacks and techniques on your web application before the hacker does! About This Book This book covers the latest technologies such as Advance XSS, XSRF, SQL Injection, Web API testing, XML attack vectors, OAuth 2.0 Security, and more involved in today's web applications Penetrate and secure your web application using various techniques Get this comprehensive reference guide that provides advanced tricks and tools of the trade for seasoned penetration testers Who This Book Is For This book is for security professionals and penetration testers who want to speed up their modern web application penetrating testing. It will also benefit those at an intermediate level and web developers who need to be aware of the latest application hacking techniques. What You Will Learn Get to know the new and less-publicized techniques such PHP Object Injection and XML-based vectors Work with different security tools to automate most of the redundant tasks See different kinds of newly-designed security headers and how they help to provide security Exploit and detect different kinds of XSS vulnerabilities Protect your web application using filtering mechanisms Understand old school and classic web hacking in depth using SQL Injection, XSS, and CSRF Grasp XML-related vulnerabilities and attack vectors such as XXE and DoS techniques Get to know how to test REST APIs to discover security issues in them In Detail Web penetration testing is a growing, fast-moving, and absolutely critical field in information security. This book executes modern web application attacks and utilises cutting-edge hacking techniques with an enhanced knowledge of web application security. We will cover web hacking techniques so you can explore the attack vectors during penetration tests. The book encompasses the latest technologies such as OAuth 2.0, Web API testing methodologies and XML vectors used by hackers. Some lesser discussed attack vectors such as RPO (relative path overwrite), DOM clobbering, PHP Object Injection and etc. has been covered in this book. We'll explain various old school techniques in depth such as XSS, CSRF, SQL Injection through the ever-dependable SQLMap and reconnaissance. Websites nowadays provide APIs to allow integration with third party applications, thereby exposing a lot of attack surface, we cover testing of these APIs using real-life examples. This pragmatic guide will be a great benefit and will help you prepare fully secure applications. Style and approach This master-level guide covers various techniques serially. It is power-packed with real-world examples that focus more on the practical aspects of implementing the techniques rather going into detailed theory.

The beloved sequel to the bestselling classic, *Mastering the Art of French Cooking, Volume II* presents more fantastic step-by-step French recipes for home cooks. Working from the principle that "mastering any art is a continuing process," Julia Child and Simone Beck gathered together a brilliant selection of new dishes to bring you to a yet higher level of culinary mastery. They have searched out more of the classic dishes and regional specialties of France, and adapted them so that Americans, working with American ingredients, in American kitchens, can achieve the incomparable flavors and aromas that bring up a rush of memories—of lunch at a country inn in Provence, of an evening at a great Paris restaurant, of the essential cooking of France. From French bread to salted goose, from peasant ragoûts to royal Napoleons, recipes are written with the same detail, exactness, and clarity that are the soul of *Mastering the Art of French Cooking*.

Extraordinary Popular Delusions and the Madness of Crowds is a study of crowd psychology by Scottish journalist Charles Mackay. The subjects of Mackay's debunking include witchcraft, alchemy, crusades, duels, economic bubbles, fortune-telling, haunted houses, the Drummer of Tedworth, the influence of politics and religion on the shapes of beards and hair, magnetizers (influence of imagination in curing disease), murder through poisoning, prophecies, popular admiration of great thieves, popular follies of great cities, and relics. Contents: Volume 1: National Delusions: The Mississippi Scheme The South Sea Bubble The Tulipomania Relics Modern Prophecies Popular Admiration for Great Thieves Influence of Politics and Religion on the Hair and Beard Duels and Ordeals The Love of the Marvellous and the Disbelief of the True Popular Follies in Great Cities Old Price Riots The Thugs, or Phansigars Volume 2: Peculiar Follies: The Crusades The Witch Mania The Slow Poisoners Haunted Houses Volume 3: Philosophical Delusions : The Alchemysts Fortune Telling The Magnetisers

Yeast, water, flour, and heat. How could this simple mixture have been the cause of war and plague, celebration and victory supernatural vision and more? In this remarkable and all-encompassing volume, H. E. Jacob takes us through six thousand dynamic years of bread's role in politics, religion, technology, and beyond. Who were the first bakers? Why were bakers distrusted during the Middle Ages? How did bread cause Napoleon's defeat? Why were people buried with bread? SIX THOUSAND YEARS OF BREAD has the answers. Jacob follows the story from its beginning in ancient Egypt and continues through to modern times. The poignant and inspiring conclusion of the book relays the author's experiences in a Nazi concentration camp, subsisting on bread made of sawdust.

Why should students have this book? First, this practice guide was written by three AP World History teachers with over 20 years of experience grading the AP World History Exam--they have seen it all and are sharing their expertise. Secondly, This guide can be used at any point in the school year. Writing prompts cover every era of history and are arranged in an easy-to-follow, chronological order. The writing practice section contains six DBQs, twelve LEQs, and seventy-two SAQs. This guide also has THREE multiple-choice practice tests. The first multiple-choice test covers the first three time periods (Paleolithic era to ~1500 C.E.) and is designed to be taken halfway through the course to give students an idea of where they stand. The other two multiple-choice exams cover the entire course curriculum. All multiple-choice questions and writing prompts are tied to the key concepts of the course and the answer key features comprehensive explanations and examples of student work. No other prep book offers this much practice material written to AP guidelines.

"You just can't trust anyone!" seems to be a constant refrain in the modern world. Indeed, learning to trust is one of life's most difficult lessons. "That's because trust is not a verb," says legendary life coach Iyanla Vanzant, "it's a noun. Trust is a state of mind and a state of being." In this wise book, the New York Times best-selling author and host of OWN's popular reality TV show *Iyanla: Fix My Life* reveals how to cultivate this liberating power—by exploring what trust really is, how to trust, and why to trust. She outlines the special rewards that come from mastering the four essential trusts: trust in God, trust in yourself, trust in others, and trust in life. And she challenges us to see how each of these are actually deeply interconnected. Too often our fear of whether or not we can really trust an individual or an institution and what they represent erodes our confidence and undermines our relationships. When trust is broken or there is a betrayal, it can bring us face-to-face with our shadow, revealing that someone has failed to live up to our

expectations and thus "outs" our hidden beliefs. "You never get what you ask for; you always get what you expect," says Iyanla. When someone betrays our trust it reveals the high price paid for such deep disconnection. This book's pragmatic trust-building prescriptions demonstrate how communication, consistency, and cooperation can antidote trust-destroying behaviors and revitalize us with increased authenticity, greater resilience, and renewed peace in every part of our lives.

John Irish and Barbara Ozuna, both experienced history teachers, have teamed up to develop this workbook to focus on the historical thinking skills that high school students in the AP* World History course must master in order to perform well on the exam.

Guiding you through the history and emergence of modern mastering techniques, then providing practical hints and tips on how to use them in your set up, Practical Mastering is the book for anyone interested in tackling this elusive art form. Providing you with solid mastering theory underpinned by years of professional experience and hands-on advice for getting the most out of your set up while honing your ears to efficiently and effectively listen to your mixes in order to create perfectly polished master tracks.

This volume considers the Russian writer Bulgakov's work, *The Master and Margarita*. It opens with the editor's general introduction, discussing the work in the context of the writer's oeuvre as well as its place within the Russian literary tradition. The introductory section also includes considerations of existing translations and of textual problems in the original Russian. The following sections contain several wide-ranging articles by other scholars, primary sources and background material such as letters, memoirs, early reviews and maps.

The fifth edition of this bestselling book is for school and MA26 students taking courses in Modern World History and for undergraduates in History and International Relations. It is a complete, self-contained, lively and highly readable course, suitable for individual study or classroom use. The general reader who wishes to find out how the world got into its present state will also find the book useful. Key features of the fifth edition: • A new chapter on Latin America and its changing relationship with the USA • New sections on the Arab Spring, the 2008 financial crash and its aftermath, and the European Union in crisis • New material on the changing face of communism in China; USA: Bush to Obama; Russia under Putin and Medvedev; the continuing conflict between Palestinians and Israelis and the 'war against terrorism' Content includes: • A survey of international relations and war from 1900 to 2012 • Europe and its history - the rise and fall of fascism and communism • International affairs of the major superpowers - USA, Russia/USSR and China • International conflict -The Holocaust, 9/11 and the fall of Saddam Hussein • Decolonization and subsequent events in Africa, and the rise of political Islam • Global problems - climate change, economic crises, the population 'explosion' • Mention of disagreements and controversies among historians, as well as new interpretations and discoveries Norman Lowe has had many years' experience of teaching History at all levels, and for 25 years was Head of History at Nelson and Colne MA26 in Lancashire. He is the author of *Mastering Modern British History* and *Mastering Twentieth Century Russian History*.
